

Kuniseal Tape TP-50

DESCRIPTION

Kuniseal Tape TP-50, is a composite product consisting of cloth covered in a bentonite/mineral oil solution, which is specifically designed as a water barrier where water has made contact on any of it's surfaces. Expansion potential is approximately 2 times. TP-50 will expand to fill voids where water has penetrated.

SPECIAL FEATURES

- * No special adhesive needed.
- * Installation time is reduced.
- * Long lasting, insitu durability.
- * Superior results in stopping moisture penetration.
- * Suitable for marine environment.

RECOMMENDED FOR

- * Flat surface construction joints.
- * Slab Joins.
- * Window and door surrounds.
- * Sleeve tubing, piping and ducting.
- * H shaped beams

PACKAGING

TP-50 is available in 10 meter rolls. The standard size is 50mm wide x 1.4mm thick.

STORAGE

Store in dry conditions, avoid contact with water.

HEALTH AND SAFETY

TP-50 does not present any undue hazard and is non-toxic, however gloves should be worn as skin may be irritated with prolonged contact. Wash with soap and water after use.

APPLICATION PROCEDURES

TP-50 is easy to use and apply. The surface should be clean (dust free) and dry before applying. Place TP-50 over the join or around the piping so as to be near as possible to the center of the concrete thickness. Cut with a knife or scissors at the end point. If TP-50 is to be joined, overlap by at least 10mm.

WARRANTY

The Manufacturer warrants that the products manufactured by it shall be free from material defects and will be consistent with its normal high quality. Should any of the products be proven defective, the liability to the Manufacturer shall be limited to replacement of the product ex factory. The Manufacturer makes no warranty as to the merchantability of fitness for a particular purpose and this warranty is in lieu of all other warranties expressed or implied. The user shall determine the suitability of the product for its intended use and assume all risks and liability in connection therewith.
